

The new concentrated cleaning
system *goes with you
everywhere*

A sustainable system of concentrated products
No automatic dosing systems required

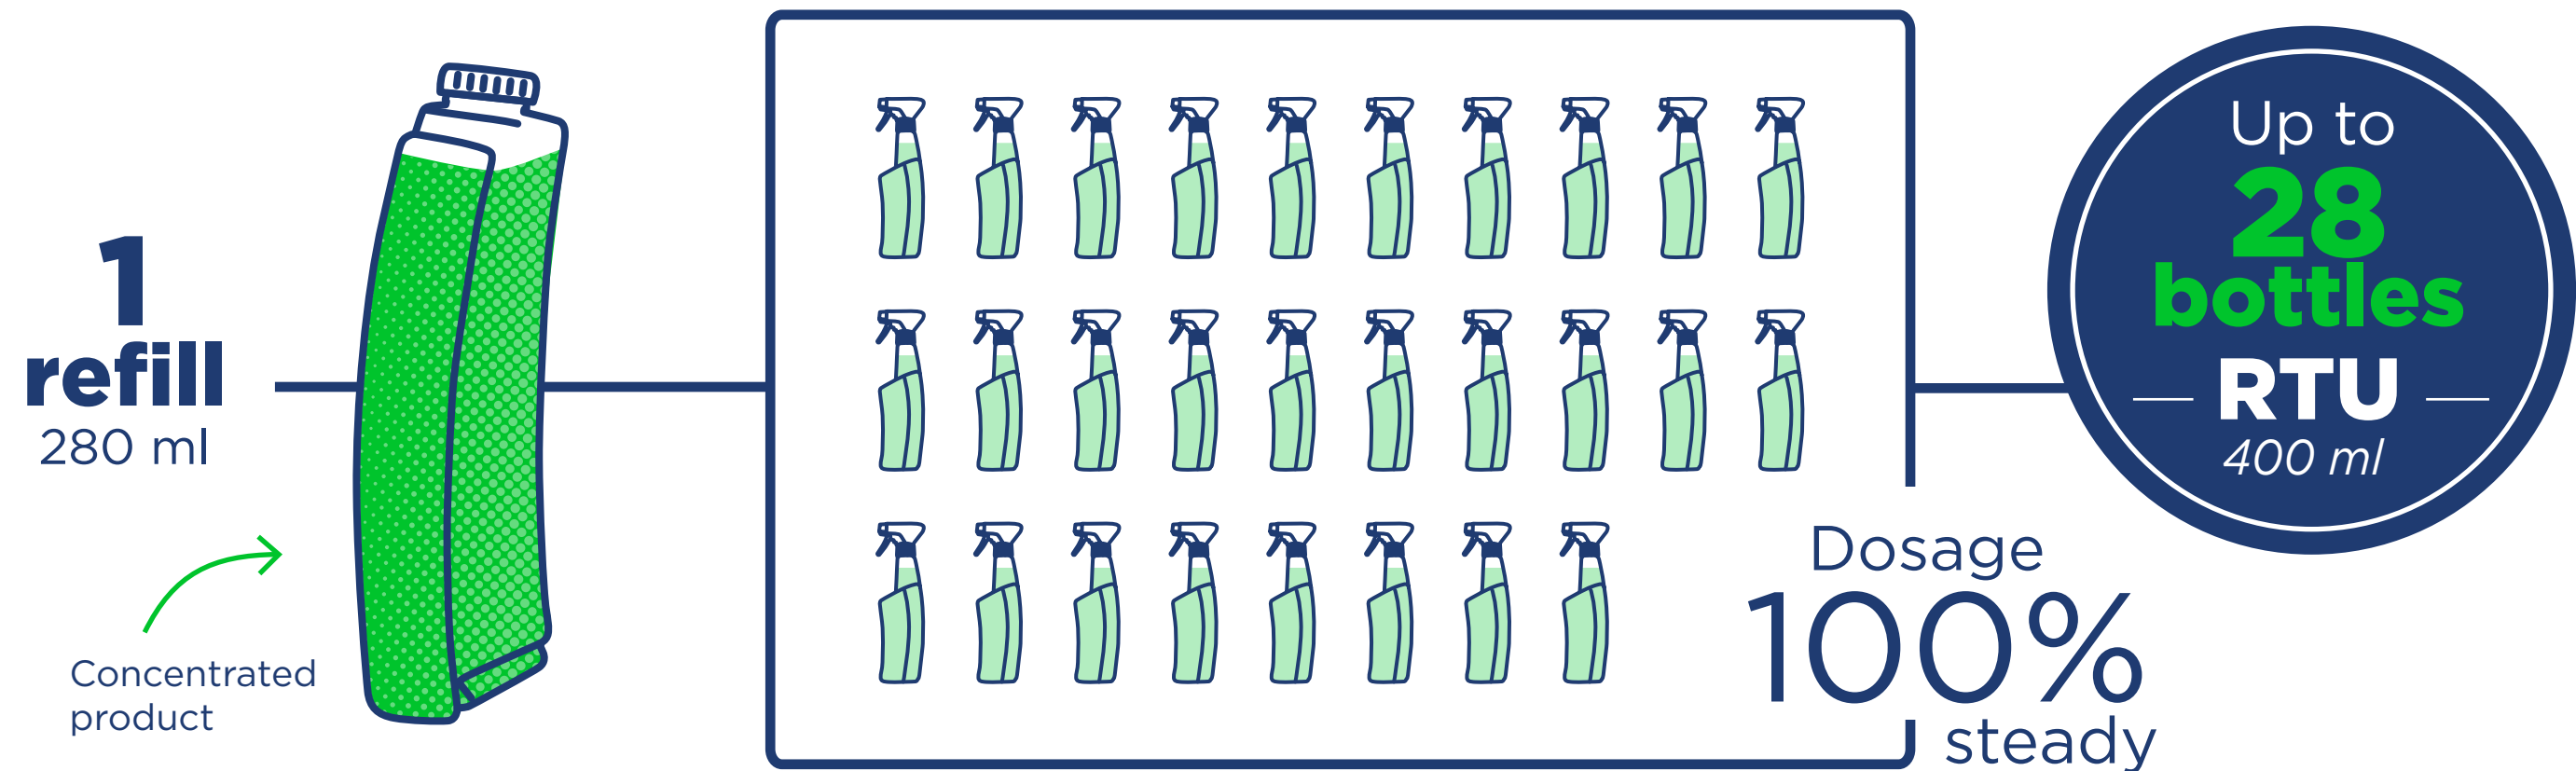

Advantages:

- ☑ **Efficient and cost-effective**
- ☑ **No dosing systems required**
- ☑ **Safety for the user**
- ☑ **Sustainable system**
- ☑ **Less stock and storage space required**

Advantages:

✓ Efficient and cost-effective

Proven efficiency according to the quality and product safety standards defined by the IKW

(The German Cosmetic, Toiletry, Perfumery and Detergent Association)

IKW Recommendation for the Quality Assessment of the Product Performance of All-Purpose Cleaners

IKW Recommendations for the Quality Assessment of Acidic Toilet Cleaners

IKW Recommendations for the Quality Assessment of Bathroom Cleaners

Advantages:

✓ **No automatic dosing systems required**

- 1 Head and spray gun
- 2 400 ml water tank for dilution
- 3 280 ml refill of concentrated product

Advantages:

✓ **No automatic dosing systems required**

Advantages:

✓ **No automatic dosing systems required**

Instructions for use

Insert refill

Remove refill

Advantages:

✓ Safety for the user

- **No** contact with the chemical
- **No** overdosing
- **No** handling of chemicals
- **No** weight overloading

In accordance with the recommendations of the National Institute for Health & Safety at Work

Advantages:

✓ Sustainable system

For a cleaner planet

Environmental registries

System certified with the **European EU Ecolabel**

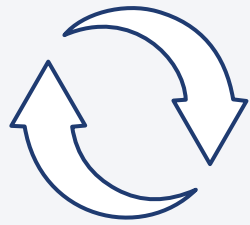

The cardboard used in system packaging is certified by the **FSC**
Forest Stewardship Council

Advantages:

✓ **Sustainable system**

Reduce

Reduction of

93%

of plastic waste

ECODUO reduces up to 93% the amount of plastic used per sprayer, as the only waste is the concentrated product refill.

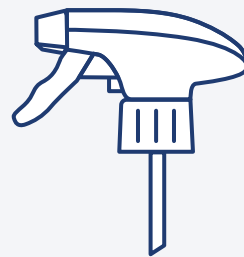

Reduction of

97%

of the carbon footprint during transport

Using concentrated products, the ECODUO system reduces the impact of transport in terms of **CO emissions** up to 97%.

Reduction of plastic waste compared to **single-use spray guns**

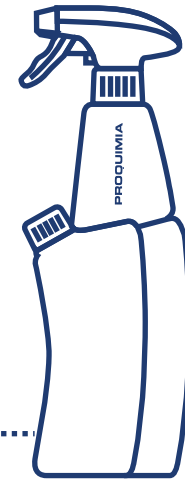

The lifetime of the ECODUO system spray guns exceeds 50,000 sprays. Compared with traditional products where the sprayer is thrown away once used, this range offers a very significant reduction in plastic waste.

Advantages:

✓ **Sustainable system**

Reuse

EcoDesign

The ECODUO cleaning system allows **infinite reuse** of the application system (water tank + spray gun), developing a totally circular system.

Advantages:

✓ **Sustainable system**

Recycle

ECODUO gives priority to the use of **recycled and recyclable plastic** materials, minimising the use of single-use plastic components.

The refill of the concentrated product is made of **single-material plastic**, allowing its complete recycling.

The composition of most conventional packaging is multi-material.

Advantages:

✓ **Sustainable system**

Reuse

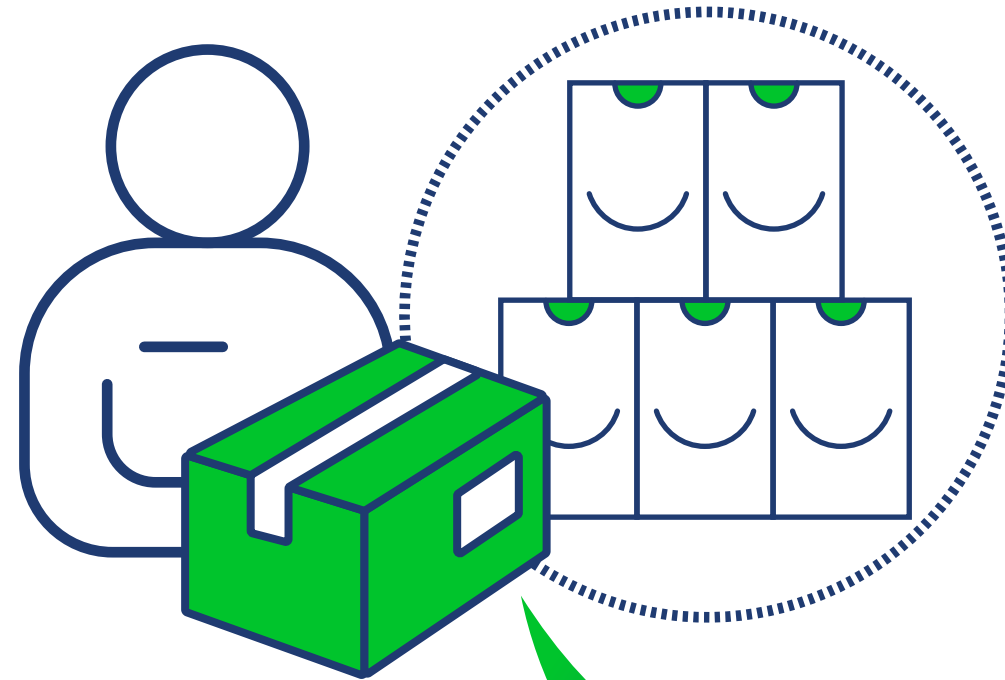

At the end of the spray gun's life (more than 50,000 sprays), the sprayer head is changed so that the system can be used again, unlike traditional systems which are not recoverable.

Advantages:

✓ **Less stock and storage space required**

Range of products

Housekeeping

DUO BAC

Multi-purpose
disinfectant

Pesticide Register
Nº 20-20/40/90-10515

ECODUO WIPE
